

Kevin Audrain

Senior Simulation Software Engineer | Navy Nuclear Veteran

Hampton Roads, Virginia Metropolitan Area (Transitioning to Greater Philadelphia Area)

Summary

I am a Senior Software Engineer and Technical Lead with 25 years of experience spanning Naval Nuclear operations and high-stakes enterprise software. I specialize in turning around under-scoped technical programs, building automated CI/CD pipelines, and leading distributed teams to deliver mission-critical simulation systems. My core skill set includes full-stack development, advanced simulation engineering in Unity, Unreal, and Godot, and mature DevOps practices with Jenkins and Bamboo. I am transitioning to the Greater Philadelphia Area and seeking remote or regional technical leadership roles.

Top Skills

- **Unity Game Development**
- **Continuous Integration and Continuous Delivery (CI/CD)**
- **C# in .NET**

Professional Experience

Long Wave Inc.

Senior Software Engineer | *Nov 2024 – Present*

- Directed a distributed team of 6 (3 developers, 3 QA) to update a high-stakes MRTS 3D training simulator for E-6B aircraft maintenance, establishing a critical training platform for hundreds of US Navy personnel.
- Architected and built the project's automated CI/CD pipeline from scratch using Bamboo.
- Modernized the simulator's user experience by expanding the Unity and WPF (C#) interfaces to fully support diverse input methods.

Mission Technologies, a division of HII

Senior Software Engineer | *May 2022 – Oct 2024*

- **DCD/JAAR Team:** Delivered the Data Collection and Debrief shipboard application, integrating a C# back-end with a PostgreSQL database and an Angular front-end. Modernized CI/CD infrastructure with Pipeline-as-Code (Jenkinsfiles).
- **RAVE Team:** Maintained a critical Unity-based SaaS application for large-scale Navy training events. Architected the team's first automated CI/CD pipeline from scratch.

CAE USA

Innovation Software Developer - VR/AR | *Sept 2021 – May 2022*

- Spearheaded technical evaluation and approval of advanced VR/AR training simulators for USAF pilot training programs (F-15, A-10, AWACS).
- Engineered synthetic task environments utilizing Unity and Unreal Engine to integrate diverse VAMR hardware.

General Dynamics Information Technology (GDIT)

Software Engineer for Curriculum Development | *Mar 2020 – Sept 2021*

- Assumed de facto technical leadership of an under-scoped software initiative, delivering four distinct Unity-based MRTS applications from the ground up.
- Rescued the project timeline by introducing Jira and directed the end-to-end 3D asset production pipeline, including organizing physical LiDAR scans.

Audrain Entertainment

Game Developer | *June 2018 – May 2021*

- Commanded the complete software development lifecycle (SDLC) as a solo developer to engineer, publish, and maintain five commercial mobile games on the Google Play Store (Unity, C#).

L3Harris Technologies

Project Lead - Continuous Operational and Maintenance Assessment | *Aug 2019 – Feb 2020*

- Served as the primary L3Harris Site Lead at the Mid-Atlantic Regional Maintenance Center (MARMC) on Naval Station Norfolk.
- Modernized legacy data infrastructure by introducing Git version control to a complex Microsoft Access and VBA database.

US Navy

Navy Nuclear Veteran | *Sept 1999 – Sept 2019 (20 Years)*

- **Talent Development Manager (2017-2019):** Led a 2-week leadership course for 600 students and drove a digital transformation to electronic curriculum.
- **Nuclear Propulsion Plant Supervisor (2005-2017):** Directed maintenance schedules and 11-person technical teams in at-sea zero-error-tolerance operations.
- **Nuclear Propulsion Plant Operator (1999-2005):** Executed reactor maintenance and at-sea power generation operations.

Education

- **MBA, Applied Computer Science** – Northcentral University; **Java Programmer** – Penn Foster Group; **BS, Nuclear Engineering Technology** – Thomas Edison State College; **Computer Engineering** – Old Dominion University; **Nuclear Power School** – Naval Nuclear Power Training Command (NNPTC)
